

UNICLAMP PRODUCTS 2019

The Uniclamp:

The Uniclamp is a patented, size-adjustable clamping solution designed to fit the unistrut. It's composed of durable reinforced nylon, can be installed without the use of tools, and accommodates pipe or cable diameters from 9mm to 127mm (dramatically speeding up your installations and simplifying your inventory management). The Uniclamp has a tensile strength of 410kg and can withstand shear forces of up to 700kg.

The Surface Mount:

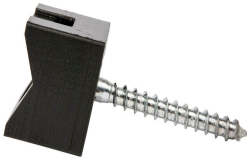

The Surface Mount has been purpose built to extend the Uniclamp's range of applications even further. Simply rivet or screw the mount into any surface, lock your Uniclamp in place, and lay your cables and pipes in their desired configuration.

The V-Bat:

The V-Bat is a flat surface application with all the utility of the original Uniclamp (accommodates multiple cable / pipe diameters, simplifies inventory management, etc). It's single mounting point makes it ideal for drywalls, or suspending rods from wooden boards.
